Center project name: H_NH0125F14

Sequencing vector: M13; 70%
Sequencing vector: plasmid; 30%
Sequencing vector: plasmid; 30%
Chemistry: Dye-primer ET; 70% of reads
Chemistry: Dye-terminator Big Dye; 30% of reads
Assembly program: Phrap; version 0.990319
Consensus quality: 164779 bases at least Q30
Consensus quality: 174798 bases at least Q30
Consensus quality: 174798 bases at least Q20

It currently consists of 15 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           5671: contig of 5671 bp in length

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             overlap relationships among clones to be deduced. However, it should not be assumed that this clone will be sequenced to completion. In the event that
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             NOTE: This record contains 86 individual sequencing reads that have not been assembled into contigs. Runs of N are used to separate the reads and the order in which they appear is completely arbitrary. Low-pass sequence sampling is useful for identifying clones that may be gene-rich and allows
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  be preserved.
